NFT GAME INTERACTIVE

GAME INDUSTRY

FIGHT TO EARN **GAMING**

At MetaRealFights, we are revolutionizing the fighting game industry with crypto and NFTs. Our goal is to create a truly memorable gaming experience that stands among the giants of AAA titles. For far too long, independent studios were unable to compete for the same level of success—but today, crypto and NFTs have provided the fundraising capabilities we need to make our dream a reality. We are building a free-2-play competitive fighting game with e-sports in mind, combining classic gaming elements with groundbreaking crypto features. With MetaRealFights, we're bringing crypto games to a whole new level and taking players on an unforgettable journey they won't find anywhere else.

GAME INDUSTRY

CRYPTO GAME

Crypto-enthusiasts and hardcore gamers alike will be thrilled to enter the world of **MetaRealFights**, a **crypto game** featuring the best fighters from across the Multiverse. Not only will players be able to fight for fame and glory against each other, but they'll also be able to trade, level up their fighters, and customize them in an economy that allows users to truly own their in-game resources. Combining traditional fighting modes such as 1v1 battle with story modes offering additional motivation and **rewards**, **MetaRealFights** promises something for everyone—from crypto enthusiasts climbing up leaderboards to gamers discovering their Fighter's backstories whilst **earning crypto awards** for their efforts. Players even have access to regularly scheduled challenges where valuable crypto prizes may be earned, including Non Fungible Tokens (NFTs) and free entry into esports tournaments. So what are you waiting for? **Join MetaRealFights now!**

GAME INDUSTRY

NFT GAMING

MetaRealFights is the crypto game to look out for - not only will it feature fun and challenging gameplay mechanics, but also an esports-friendly Arcade Mode and a NFT Enhanced Mode which allows players to customize their Fighters with additional strategy and tactics. Moreover, all items in MetaRealFights are completely owned by its players as Non-Fungible Tokens (NFTs). These tokens can be earned through playing Story mode, completing challenges, and competing in tournaments. With this innovative crypto game, players can look forward to developing a strong in-game economy where they can earn and spend their crypto rewards!

FUTURE GAMING

MOBILE GAMING

More than 2 billion people play video games. That's more than a quarter of the Earth's population. That's a \$170+ billion industry that is growing at 10-12% annually. A huge amount of value is created every day by developers and gamers. Until now, there has been no practical way for gamers to monetize this value. MetaRealFights Offers players the opportunity to fight in the real world with AR & VR functionality and also in the Metaverse, The thriving amateur fighting game community is one of the most famous and passionate in the world, and MetaRealFight can be the catalyst for its exponential growth.

THE BEST PLAYER

Smartphone gaming has been growing over the past two years. The mobile gaming market has been valued at \$79 billion in 2020, with a global average of 1.5 million mobile game players in 2020. This growing demand for mobile games is directly a result of various technological advances such as AR, VR, cloud gaming and 5G. This trend is not surprising, considering that the mobile gaming industry is mainly based on new technologies.

THE BEST TEAM

MetaRealFights Offers players the opportunity to fight in the real world with AR functionality and also in the Metaverse, The thriving amateur fighting game community is one of the most famous and passionate in the world, and MetaRealFights can be the catalyst for its exponential growth.

MRF UTILITY TOKEN

Game Utility Token

Using a compliant crypto token called MRF, MetaRealFights provides a complete gaming solution that utilizes the power, trust, and transparency of blockchain. To facilitate economic transactions within the MetaRealFights arcade game. Players using a Blockchain wallet can purchase MRF tokens. They can then use them in-game to purchase items such as training cards, participate, and create tournaments to increase the performance of their fighters. MRF Tokens can be used to purchase NFTs and use them in the Multiverse

ETH ERC20

Blockchain Ethereum

1000,000,000

Total Supply

AN AWARD-WINNING COMMUNITY

In MetaRealFights, players can spend their hard-earned MRF points on raffle tickets to enter our sweepstakes, where players can win a variety of physical and digital goods such as game gear, META REAL FIGHTS upgrades and Item NFTs, and exclusive merchandise. \$MRF token holders will also have the ability to participate in higher tier giveaways and have a higher cap on the number of entries they have each week.

MRF REWARDS

REWARDS NEW GENERATION

To facilitate economic transactions within the MetaRealFights Multiverse Game. Players using a Blockchain wallet can purchase MRF tokens. They can then use them in-game to purchase items such as training cards, to increase the performance of their fighters. MRF Tokens can be used to create, organize and join their own tournaments to earn rewards and put their skills to the test against other players of their level. Using a compliant crypto token called MRF, MetaRealFight provides a complete gaming solution that utilizes the power, trust, and transparency of blockchain.

MARKET SIZE & GROWTH

MARKET OPPORTUNITY

The gaming market is immense and its growth potential is undeniable. The global gaming market was valued at USD 176 billion in 2020, with 2.7 billion players worldwide, and is predicted to grow to USD 217.9 billion by 2023, showing an impressive Compound Annual Growth Rate (CAGR) of 9.4%. Adding further to the market's potential, crypto games and Non-Fungible Tokens (NFTs) have revolutionized how players earn rewards within the gaming ecosystem. In fact, blockchain gaming is currently valued at USD 1.6 billion, but is projected to be worth USD 50 billion by 2025 as more developers join this trend of "Play-to-Earn". There are over 1000 crypto games already on the market providing players with new ways to monetize their digital assets; this encourages a strong sense of community building that leaves users feeling richer for the competition experience too!

VR FIGHTING

ALL YOU ADD IS EFIGHTING

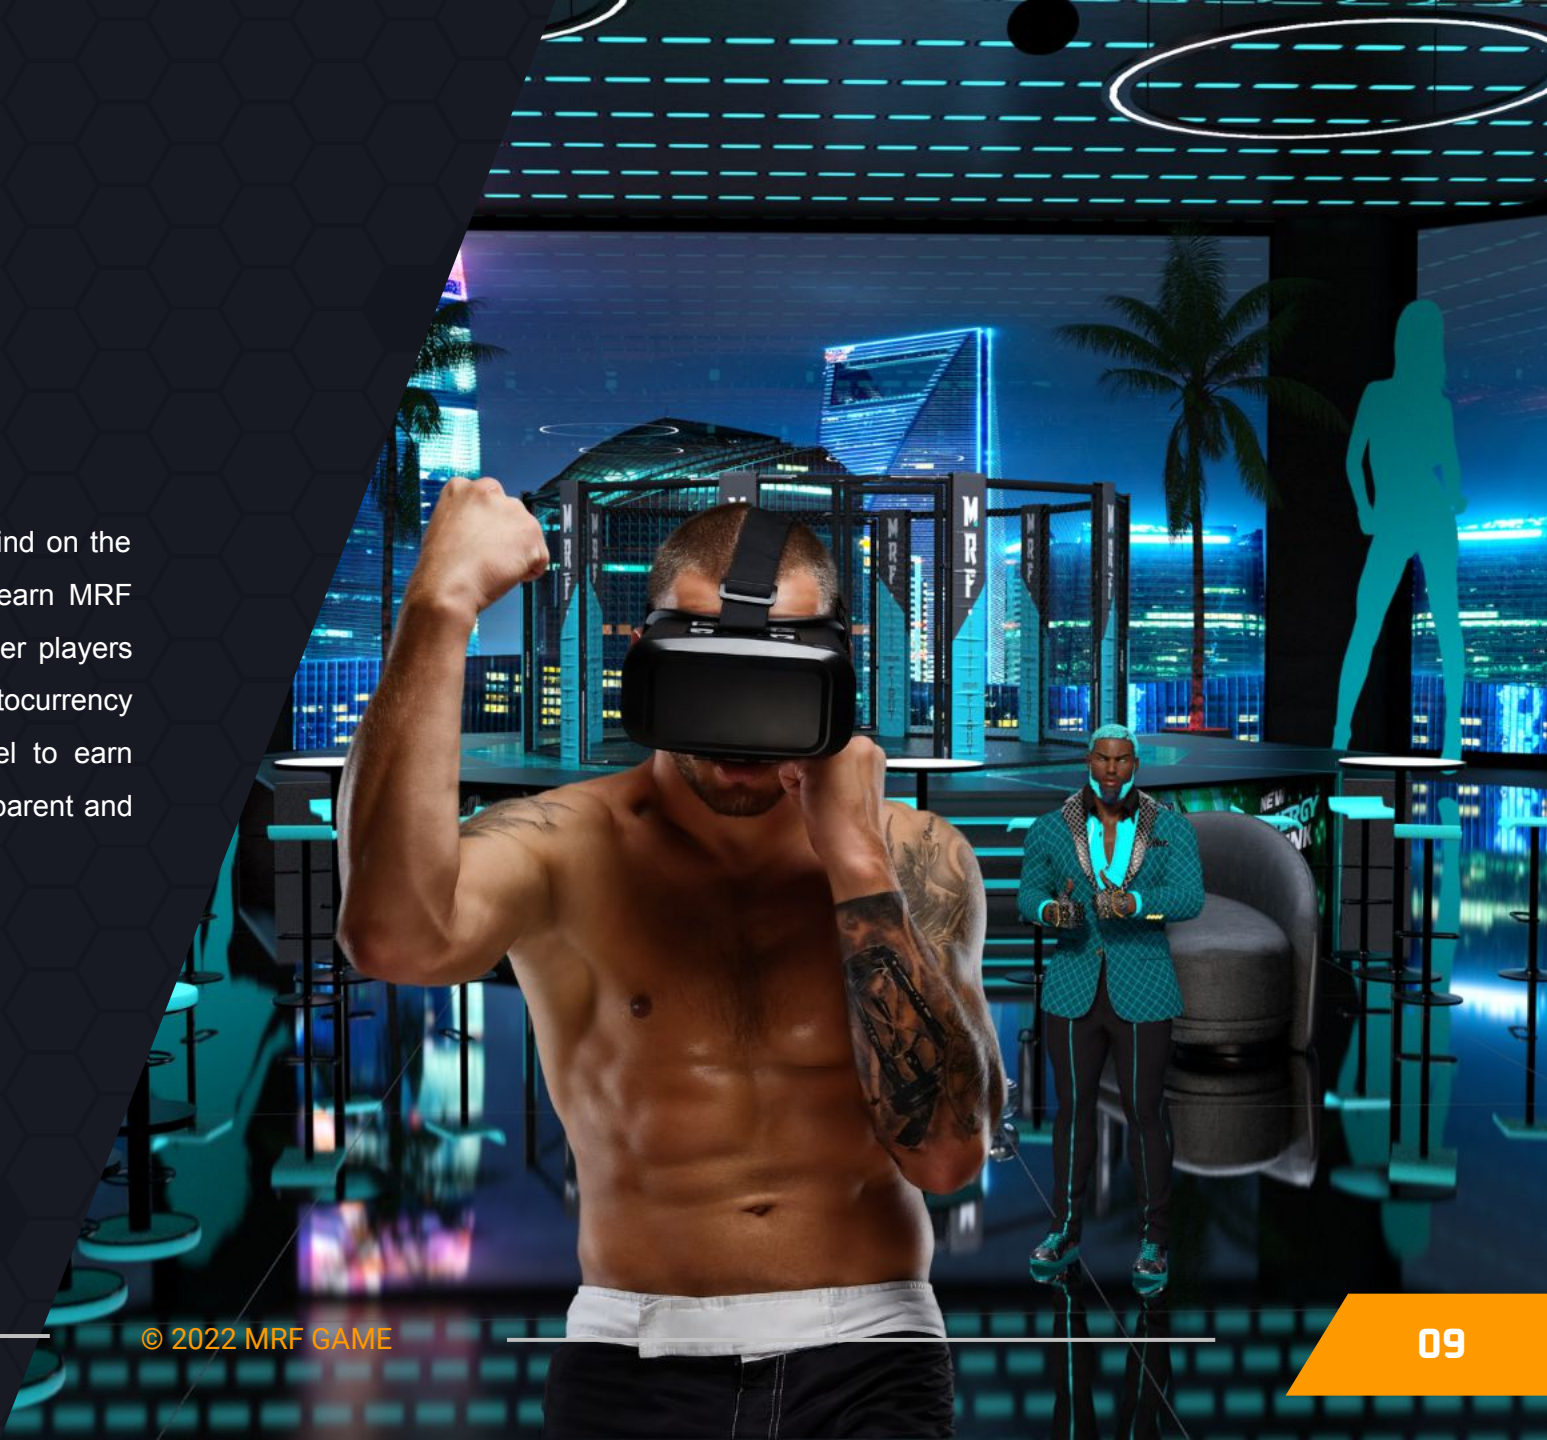

MetaRealFights is the first 3D AR/VR fighting game of its kind on the blockchain. Our concept offers players the opportunity to earn MRF tokens while building an empire and competing against other players around the world. Blockchain technology and a cryptocurrency specialized in video games take gamers to the next level to earn money by playing video games, while guaranteeing a transparent and limited supply of tokens.
